PROFILE

AI & Full-Stack Developer with **3.5+ years of professional experience** – writing software since **11th grade**. At Mataaf Technology I went from **intern to full-stack & AI developer in 18 months**, shipping production systems across **voice AI, multi-agent LLM platforms, real-time communication (WebRTC), Web3 and cross-platform mobile** – **5 apps live on the Play Store (2 on iOS too), 10,000+ downloads and 100-200 new users a day**, plus freelance products for clients in **Canada & the UK**. I pair LLMs (GPT, Claude, Gemini) with clean microservices engineering, plus WordPress, Docker hosting and **SEO / AEO / GEO** growth.

KEY ACHIEVEMENTS

★ **FLAGSHIP** **Pixo – Private Vault just crossed 10,000+ downloads** on **Play Store & iOS App Store**, growing **100-200 new users a day** – and I built it **single-handedly, as the only developer**.

- ★ **5 apps live in production** – Pixo, MSpark, ReplyAI, GloFi, MataafPOS (Pixo & GloFi on both stores).
- ★ **Promoted twice in 18 months**: intern → junior → full-stack & AI developer; now lead AI-first products and mentor juniors.
- ★ **4 freelance products delivered for clients in Canada & the UK**, all in production.

EXPERIENCE

Full-Stack & AI Developer
07/2024 – Present

Mataaf Technology · Remote

- Lead development of **AI-first products**: voice AI agents, **multi-agent LLM systems**, RAG pipelines and process automation using **GPT, Claude & Gemini**; review code, mentor juniors and drive Agile delivery.
- Architected backends on **microservices** (Node.js/NestJS, Python/FastAPI) with **Docker**, Nginx and **CI/CD on AWS**; own deployments end-to-end.
- Engineered **real-time systems** – WebRTC P2P audio/video calling and Socket.io messaging at production scale.
- Shipped cross-platform mobile apps (**React Native** + native Kotlin/Swift modules) – **5 live on the Play Store, 2 on the iOS App Store, 10K+ downloads**.
- Manage client websites end-to-end: **WordPress** builds, Docker-based hosting & maintenance, and **SEO / AEO / GEO** strategy for organic & AI-search visibility.

Junior Full-Stack Developer
04/2023 – 06/2024

Mataaf Technology · Remote

- Built full-stack features across **React, Next.js, Angular** frontends and **Node.js/NestJS** backends with MongoDB & PostgreSQL.
- Released **React Native** apps – auth, push, IAP and store launches.
- Integrated **OpenAI GPT APIs** into chatbots and internal tools; delivered client **WordPress** sites with on-page **SEO** and performance tuning.

Software Development Intern
01/2023 – 03/2023

Mataaf Technology · Remote

- Shipped production UI components (React) and REST APIs (Express) in month one – **promoted to Junior Developer in 3 months**.
